## Hyattsville Public Works Building

4633 Arundel Place Hyattsville, MD 20781

### Germicidal UVC Lighting and Air Purification Proposal

**GOAL:** A safe work environment and meeting place

**STRATEGIES:**

- > *Air purification*
- > *Germicidal UV lighting proven to eliminate airborne bacteria and viruses*
- > *Enhanced filtration systems*

## TECHNOLOGIES:

	<p><b>Wall Mount Air Purifier with Ionization and UV Lamp</b></p> <p>(28) units to be installed throughout multiple rooms and smaller areas in the one story building. Controlled via handheld remote or touch panel on front of unit.</p>
<p>The unit is wall-mounted and uses 2 small fans to continually cycle air up through the front of the unit and out through the top of the unit. Inside the unit is a MERV 13 filter and an 8.5-watt UV-C germicidal irradiation lamp. The units will eliminate airborne bacteria, viruses, and harmful pollutants quickly without exposing occupants to UV-C rays. Filters would be changed every 90 days. Bulbs have a five-year life span</p>	
	<p><b>High Occupancy Air Purifier</b></p> <p>(7) units to be installed in larger areas throughout the building. Controlled via WiFi enabled app, handheld remote.</p>
<p>The unit is wall-mounted and uses a small fan to continually cycle air up through the bottom of the unit and out through the top of the unit. Inside the unit are multiple layers of MERV 13 filters and four 45-watt UV-C germicidal irradiation lamps. The units will eliminate airborne bacteria, viruses, and harmful pollutants quickly without exposing occupants to UV-C rays. Filters would be changed yearly, inspected and cleaned quarterly. Bulbs have a one-year life expectancy.</p>
